

Perceived Inequality and the Illusion of Democracy: How Subjective Class Consciousness Fuels Suspicion of Rigged Elections

Code book

Table 1. Survey information

Survey	Year	Source	Website
International Social Survey Programme (ISSP)	2004, 2009, 2014 2019	International Social Survey Programme	http://w.issp.org/menu-top/home/

Table 2. Dependent variables

Variable	Description	Note
1 Perceived income inequality	Differences in income in respondent's country are too large. Strongly disagree (=1) – Strongly agree (=5)	ISSP 2009, 2019
2 Subjective Class	Lowest class (=1) – Highest class (=10)	ISSP 2004, 2009, 2014, 2019
3 High Class	Subjective Class (8 – 10)	ISSP 2004, 2009, 2014, 2019
4 Low Class	Subjective Class (1 – 3)	ISSP 2004, 2009, 2014, 2019
5 Distrust in elections	Thinking of the last national election, how honest were the counting and reporting of votes? Highest level of trust (=1) – Lowest level of trust (=5)	ISSP 2004, 2014

Table 3. Explanatory variables for ISSP

	Variable	Description	Note
1	Income	Respondent's income	4 deciles by country
2	Employer	self-employed with employee(s)	
3	High skilled	Management or professional/associate professional positions	By ISCO
4	Low skilled	Elementary occupation	By ISCO
5	Education	Years of schooling	
6	Sex	Female = 1 Male = 0	
7	Age	~ 29 = 1 30 ~ 39 = 2 40 ~ 49 = 3 50 ~ 59 = 4 60 ~ 69 = 5 70 ~ = 6	
8	Marriage	Living with a spouse = 1 Otherwise = 0	
9	Urban	Farm or home in country = 1 Country village = 2 Town or small city = 3 Suburb, outskirts of a big city = 4 Urban, big city = 5	
10	Religion	Having a religion = 1 Otherwise = 0	
11	Political orientation	Right leaning (=1) – Left leaning (=3)
